

HARSHIT MITTAL

Software Development Engineer Intern | Full-Stack Developer | Backend Developer

Dehradun, Uttarakhand, India | +91-7460028542 | hmittal0418@gmail.com
github.com/harshitt0418 | linkedin.com/in/harshit-mittal | harshitt-mittal-portfolio.vercel.app

Professional Summary

Software Development Engineer Intern candidate with hands-on experience building and deploying scalable, production-grade web and backend applications using the MERN stack. Proficient in Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs, JSON, SQL, and Version Control (Git, GitHub). Strong foundation in Operating Systems, DBMS, Computer Networks, and System Design. Experienced in debugging and fixing issues in production code, writing clean and efficient code, and collaborating with teams using Agile methodologies. Quick learner, strong problem-solving skills, and adaptable to modern technologies.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL, Java

Web Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js, Express.js, Spring Boot, Django, REST APIs, JSON

Databases: MongoDB, PostgreSQL, MySQL, Database Management

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, System Design

Cloud & DevOps: AWS, Docker, CI/CD, Linux

Tools: Git, GitHub, Version Control, Postman, Redis, WebSockets, WebRTC, Socket.io, JWT

Professional Experience

Full-Stack Developer

Oct 2024 – Nov 2025

RentSpace – Peer-to-Peer Community Rental Marketplace | github.com/harshitt0418/RentSpace

- Developed and deployed a scalable, production-grade MERN stack web application with real-time chat via Socket.io supporting 50+ concurrent WebSocket connections; designed and documented JSON-based REST APIs with MongoDB database management for listings, users, and rental records.
- Engineered rental lifecycle management (pending, accepted, completed) with conflict detection logic; debugged and resolved critical authentication issues implementing JWT token rotation, Google OAuth 2.0, and OWASP security best practices; maintained clean, efficient code with Git version control and branch workflows.
- Deployed on Vercel and Render with CORS hardening, Helmet headers, and rate-limiting achieving 99% uptime; applied Redis caching improving performance by 30%; integrated Cloudinary for image storage following Agile development practices.

Full-Stack Developer

Nov 2024 – Jan 2025

NexusBoard – Real-Time Collaborative Whiteboard & Video Platform | github.com/harshitt0418/NexusBoard

- Designed and built a scalable MERN stack collaborative web application for 20+ concurrent users with freehand drawing, undo/redo, PDF import, and real-time cursor sync via Socket.io; managed JSON-based REST API communication and PostgreSQL database management.
- Integrated WebRTC for live video/audio, real-time chat with typing indicators, and QR-code room sharing; established CI/CD pipeline on AWS-compatible infrastructure reducing deployment time by 80%; applied Agile/Scrum methodology throughout development.
- Debugged and fixed authentication vulnerabilities implementing JWT magic-link auth, Google OAuth 2.0, HttpOnly cookie sessions, and Helmet security headers; maintained Git version control with branch protection, pull requests, and code review workflows.

Software Developer

Jan 2025 – March 2025

Jarvis Browser Copilot – AI-Powered Chrome Extension | github.com/harshitt0418/jarvis-browser-copilot

- Developed a Manifest V3 Chrome extension with 200+ voice commands via Web Speech API for hands-free browser automation; applied Object-Oriented Programming (OOP) design patterns and wrote clean, efficient code across background, content, and popup scripts; used JSON for all inter-component messaging.
- Integrated dual-AI panel (Groq Llama 3.3 70B + Gemini 2.0 Flash) for page summarization, context-aware Q&A, and multi-tab research aggregation; debugged performance bottlenecks to keep load time under 200ms; maintained full Version Control using Git with documented commit history.

Education

DIT University, Dehradun, Uttarakhand, India

Apr 2023 – May 2027 (Expected)

B.Tech in Computer Science & Engineering (Full Stack & DevOps Specialization) **CGPA: 8.35 / 10.0**

Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design, Spring Boot, Django

Achievements & Competitive Programming

- Competitive Programming:** Solved **500+** DSA problems (Arrays, Trees, Graphs, Dynamic Programming) – [LeetCode 1,652](https://leetcode.com/harshit0418/) (Top 17%, 850K+ users) | [CodeChef 2-Star](https://www.codechef.com/users/harshit0418/) (max 1,524) | [Codeforces max 1,124](https://www.codeforces.com/users/harshit0418/).
- 3rd Place – CodeStorm 2025 (CodeGenX DITU) | Team Code4Cause** | [View Certificate](#)
Built **ShareMyThaali**, a community-driven food-waste reduction web application. Users list surplus home-cooked or event meals; nearby individuals can browse a location-aware feed, send a request, and coordinate a verified pickup – connecting food donors with recipients to minimize wastage at the community level. (*CodeGenX DITU in association with InterviewBuddy & Unstop, Jul 4–6, 2025*)
